Senior Vocational Education in Vietnam (FiVe)

Prof. Dr. Utz Dornberger

1st ASEAN-German Education and Vocational Training Forum, Hamburg 2018

TVET cooperation funded by BMBF

- The goal is to offer a German senior vocational training certificate State-Certified
 Engineer in Electrical Engineering in Vietnam
- Implementing the State Certified Engineer could be a role model for future educational offers in Vietnam

German Partners

Vietnamese Partners

Supported by

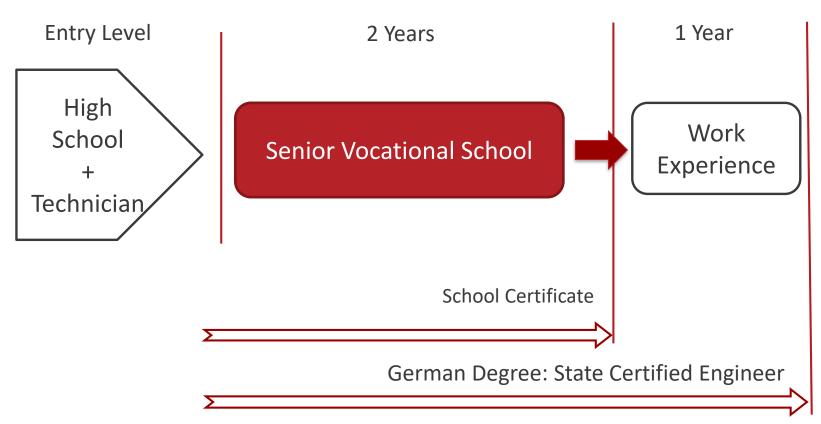

Educational Product

Project partners in Germany and in Vietnam with genuine interest to create new educational product (especially: political institutions, management of education provider, teachers)

Extensive ToT modules by various experts from Germany for Vietnamese teachers and management

- Technical methodology
 - 1 training in Germany (12 days)
 - 6 trainings in Vietnam (5 10 days each)
- Curriculum & by-law development
 - 4 workshops with teachers and management
- Online training platform

Marketing & Industry Linkages

Intensive marketing activities for positioning new educational product

- Several marketing activities to convince participants to join the course
 - Kick-off event with media coverage
 - Print & online campaigns
- Building linkages to the industry
 - Identifying companies using our large Alumni (Manager)
 network (SEPneT) in Vietnam
 - Motivate companies to support new VET program
 - Selecting the business partners: 2 Vietnamese and 3
 international companies provide 18 weeks internships for all
 participants

Status and Future Development

- First intake started in October 2017
- 17 students (full-time) to graduate in Spring/Summer 2019
- Planning the next intake and getting more industry partners involved
- Interest from industry to use state-certified engineer courses for their employees (parttime)
