

## Invitation - Webinar + Square Table (Munich)

# Webinar + Square Table (Munich): The Indian Medical Device Industry, Road Ahead

For participation, please email to [ruchi.biyani@nishithdesai.com](mailto:ruchi.biyani@nishithdesai.com)

MONDAY, OCTOBER 23, 2017

4:45 PM - 6:00 PM (CET)

VENUE: MAXIMILIANSTRABE 13, 80539 MUNICH

### PRELUDE

The Indian Medical Devices Industry is going through a regulatory churn of sorts. The government recently exercised its extra-ordinary power and fixed prices of knee implants. Unlike coronary stents whose prices were also fixed sometime back, knee implants were not officially recognized as “essential” for the country when their prices were fixed. Many other such “non-essential” medical devices appear to be on the government’s radar for price control. On a separate note, earlier in the year, the Government introduced of a completely new regulatory regime for medical devices to be effective January 1, 2018. The new regime is expected to regulate all medical devices without exception, including in-vitro diagnostic devices (IVD) and embedded software. This development is a major departure from the present scenario where the government regulates just 15 categories of medical devices. The new regulatory regime has introduced new provisions for business sensitive areas such as shelf life and mandatory recalls that may impact current operations. Clinical research of medical devices has also been revamped under the new regime. The introduction of the new regulatory regime was quickly followed by a major change in labelling requirements for presently regulated medical devices, that will also be effective from January 1, 2018.

There is no denying that a quick brush-up of the regulatory developments in the Indian Medical Devices Industry is now unavoidable. Please join us and our experts from India in the session during which they will apprise you of the business-critical developments in the regulatory framework of medical devices in India.

The event is 'by invitation only' due to limited capacity at the venue. To confirm your interest, kindly [register](#).

### SLX Boot Camp India ( July 11, 2017 ) Part 1

Since its foundation in 1900, the OAV has become a leading network of German companies with interests and activities in the Asia-Pacific region. With approximately 500 member companies to date, the OAV is a privately held, non-profit organization. Some of the world's most renowned companies from small and medium-sized enterprises to large corporations representing major commercial and industrial sectors - comprise the OAV's membership. The OAV strives to promote stronger bilateral economic relationships between Germany and the Asia-Pacific region. Through its extensive corporate and institutional network, the OAV supports German companies and their ambitions in the Asia-Pacific region. The OAV provides a platform for the exchange of the most up-to-date economic developments from the region, provides support for doing business and where possible, helps businesses overcome challenges in the region. As a founding member of the Asia-Pacific Committee of German Business, the OAV is strongly involved in the representation of the interests of German companies and is present in high-profile economic and political dialogues between Germany and the Asia-Pacific.
