

## Pathways and Partnerships for the Green Transition

With the increasing attention on the global effects of climate change, governments and businesses around the world are working together to tackle this pressing challenge in innovative ways to transform the way our economies operate.

Join us at our upcoming edition of **Germany Singapore Business Forum Connect** as we share Germany's and Singapore's plans to support sustainable development, and facilitate important conversations on the opportunities arising from our green transitions.

At registration, you can choose between one of two concurrent industry-focused breakout sessions, centred on Plastic Waste or Smart and Sustainable Cities.

### Programme highlights

- Gain insights on how businesses can form meaningful and action-driven partnerships in sustainability
- Explore how German and Singapore businesses can work together to address the plastic waste problem or create more sustainable and livable cities
- Network with like-minded partners through dedicated business matching
