

Kirirom Food Production (K.F.P) Co.,Ltd

Company Profile

1. Overall about the Cambodian agriculture

Agriculture is one of Cambodia's key economic drivers and is a source of employment for about 42 percent of the population.

Approximately 80 percent of Cambodia's population living in rural areas and dependent on agriculture for their livelihoods.

Rice is Cambodia's major crop, its principal food, and, in times of peace, its most important export commodity. Rice is grown on most of the country's total cultivated land area.

In addition to rice, other food products include Mango, Cashew nut, Cassava, Pepper and Corn will also increase more land for the crops and expand quantity for export.

2. Company profile

Kirirom History: Kirirom Food Production is a Khmer-owned business based in Cambodia's mango heartland, the Kirirom region. The factory was built and started the operation in October 2014. Current size of the plant is 10,000 m². This Plant is situated on the total area of 6 hectare of land and we own the farm has grown to more than 600 ha filled with mango.

Kirirom is now a leading producer of Cambodian Dried mangoes. Our products have exported to 12 countries.

Mango Plantation in CAMBODIA

With fertile land, favorable tropical climate and well taken care of, mango can be harvested two times per year, with the total of eight months. The main season last for five months i.e February, March, April, May and June. Then the next season starts from October, November and December.

Mango Variety “KEO ROMET”

“Keo Romet” becomes the most popular variety nowadays because of its taste, color and lovely appearance. In addition, it is the focus of discussion regards to volume of supply and its uniqueness of less fragile. taste is a bit sour when mature and color will turn to yellow when it is well-ripen. Tasty, sweet and nice smell: are the adjective of description of this lovely mango type.
